Professional Summary

Data Engineer at **Accenture** specializing in **Python, PySpark, SQL, and AWS-based data solutions**. Experienced in **CEDW data warehousing, ETL/ELT pipelines, SAL/CAL layer implementation, and performance optimization**. Permanently resolved **100+ recurring production job failures** through **root cause analysis and code enhancements**, ensuring reliable data processing and business continuity.

Technical Skills

Programming	:	Python, SQL
Big Data	:	PySpark, Apache Spark, Hadoop
Data Engineering	:	ETL/ELT, Data Pipelines, Data Modeling, Data Warehousing
Databases	:	Amazon Redshift, MySQL, PostgreSQL
Cloud and IaC	:	AWS (S3, Glue, Lambda), Terraform
Workflow and Tools	:	Apache Airflow, IWS, Git, Docker, Linux
AI Tools	:	GenWizard, Claude Code, GitHub Copilot, OpenAI Codex
Architecture	:	System Design Fundamentals

Professional Experience

Accenture Bengaluru, India
Associate Software Engineer (Data Engineer) *Sep 2024 – Present*

- Debugged and optimized **Python, PySpark, and SQL** workflows in the **CEDW data warehouse**, permanently resolving **100+ recurring job failures** across **Amazon Redshift and MySQL**.
- Implemented new **business logic** in **SAL and CAL data layers**, updating data transformations to support changing business and reporting requirements.
- Provided **deployment support and production monitoring** for scheduled data workflows, investigated job failures, and restored processing through root-cause fixes.
- Collaborated directly with **clients and business users** to investigate data discrepancies, understand requirements, communicate findings, and deliver reliable solutions.

Varcons Technologies Bengaluru, India
Machine Learning Intern *Feb 2024 – Mar 2024*

- Implemented **KNN, Decision Trees, and Gaussian Naive Bayes** models in Python.
- Cleaned and preprocessed datasets using **Pandas and NumPy**; explored data patterns and visualized findings with **Matplotlib**.

Projects

UrbanPulse *Python, PySpark, AWS, Airflow, Terraform, dbt* GitHub

- Built an **end-to-end urban mobility data pipeline** for ingestion, transformation, and analysis using **Python, PySpark, and AWS**.
- Orchestrated **ETL workflows with Apache Airflow** and modeled warehouse transformations using **dbt and Amazon Redshift**.
- Provisioned supporting **AWS infrastructure with Terraform** to make cloud setup repeatable.

DataNexus *Python, PySpark, Kafka, Airflow, AWS, Terraform* GitHub

- Developed a **streaming data processing pipeline** with **Apache Kafka, PySpark, and SQL** to ingest data from multiple sources.
- Organized transformations into **Bronze, Silver, and Gold layers** to support staged data processing and analytical use cases.
- Automated **data pipeline orchestration** using **Apache Airflow** for scheduled processing workflows.

Education

CMR Institute of Technology Bengaluru, Karnataka
B.E. in Information Science and Engineering | CGPA: 8.42/10 *2020 – 2024*

R N Shetty PU College Kundapura, Karnataka
Pre-University (PCMB) | 83.5% *2018 – 2020*

Government High School, Aloor Kundapura, Karnataka
Secondary School Leaving Certificate (SSLC) | Percentage: 93.12% *2018*

Certifications

- **Data Warehouse Fundamentals** – IBM; **Introduction to Data Engineering** – IBM
- **Advanced Terraform: Multi-Cloud Production Management** – Packt; **System Design Fundamentals** – Pearson

Hobbies & Interests

Cycling, Running, Football, Badminton, Drawing, and Video Editing
